

Task

AWS Services

Name: Swedha Murugaiyan

1. Elastic Compute Cloud (EC2):

The first screenshot shows the 'Launch an instance' page in the AWS Management Console. The 'Name and tags' section has 'Swedha M' entered in the 'Name' field. The 'Application and OS Images (Amazon Machine Image)' section is expanded, showing a search bar and a list of AMIs. The second screenshot shows a green success message: 'Successfully initiated launch of instance (i-0909bd2316f920ec7)'. Below the message is a 'Launch log' section. The third screenshot shows the 'Instances (1)' page. The instance 'Swedha M' is listed with ID 'i-0909bd2316f920ec7', state 'Running', and type 't3.micro'. The status check shows '2/2 checks passed'.

Name	Instance ID	Instance state	Instance type	Status check
Swedha M	i-0909bd2316f920ec7	Running	t3.micro	2/2 checks passed

2. Simple Storage Service (S3):

The image displays three sequential screenshots of the AWS S3 console interface, illustrating the process of creating and managing a bucket.

Top Screenshot: Bucket Creation Confirmation
This screenshot shows the 'Successfully created bucket "appptask"' message. Below the message, the 'Account snapshot' section is visible. The 'General purpose buckets' tab is selected, showing a list of buckets. The bucket 'appptask' is listed with the following details:

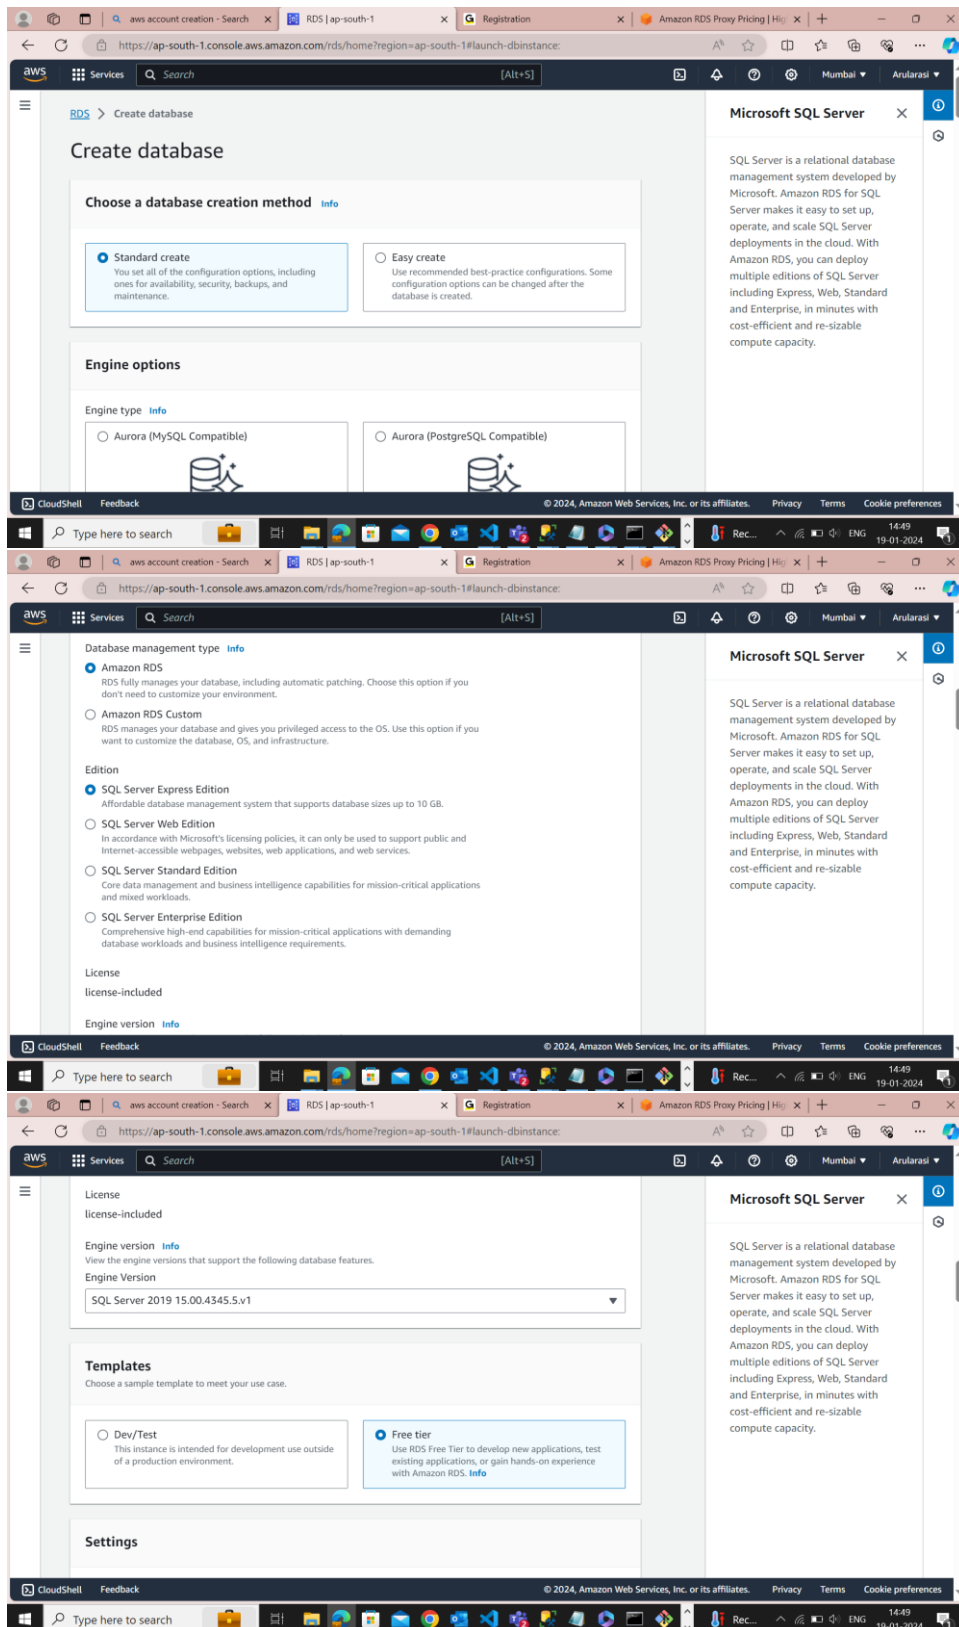

Name	AWS Region	Access	Creation date
appptask	Europe (Stockholm) eu-north-1	Bucket and objects not public	January 19, 2024, 12:14:05 (UTC+05:30)

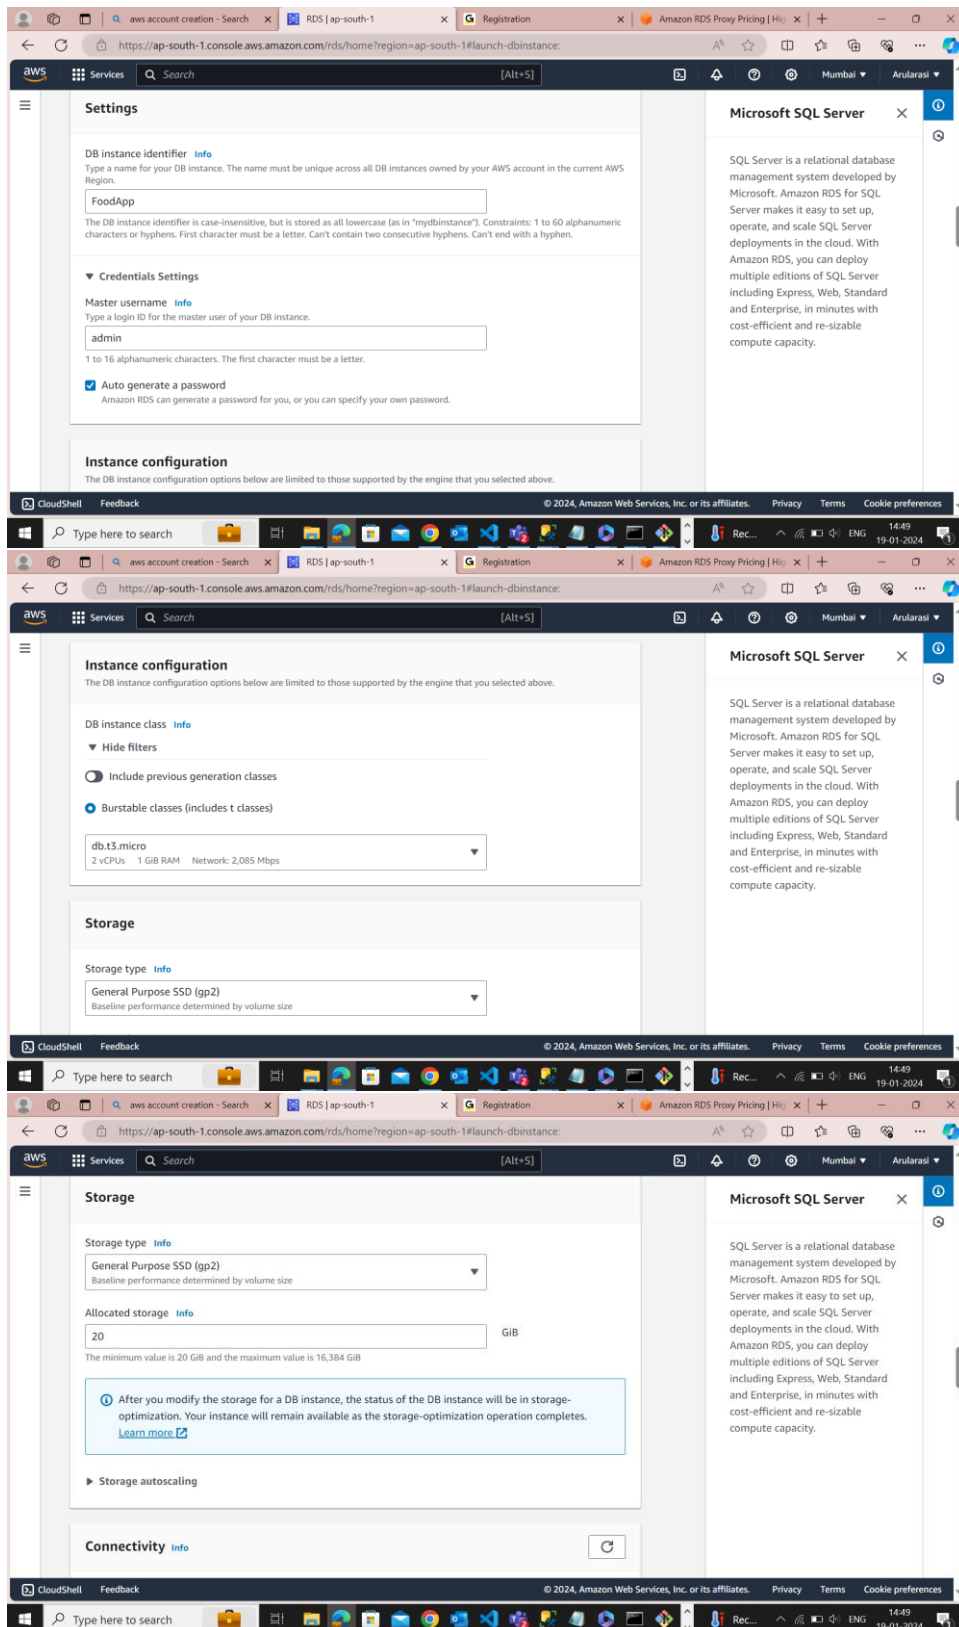

Middle Screenshot: Upload Objects
This screenshot shows the 'Upload objects - S3 bucket app' page. It displays the 'Files and folders (1 Total, 302.8 KB)' section, which includes a table of files to be uploaded:

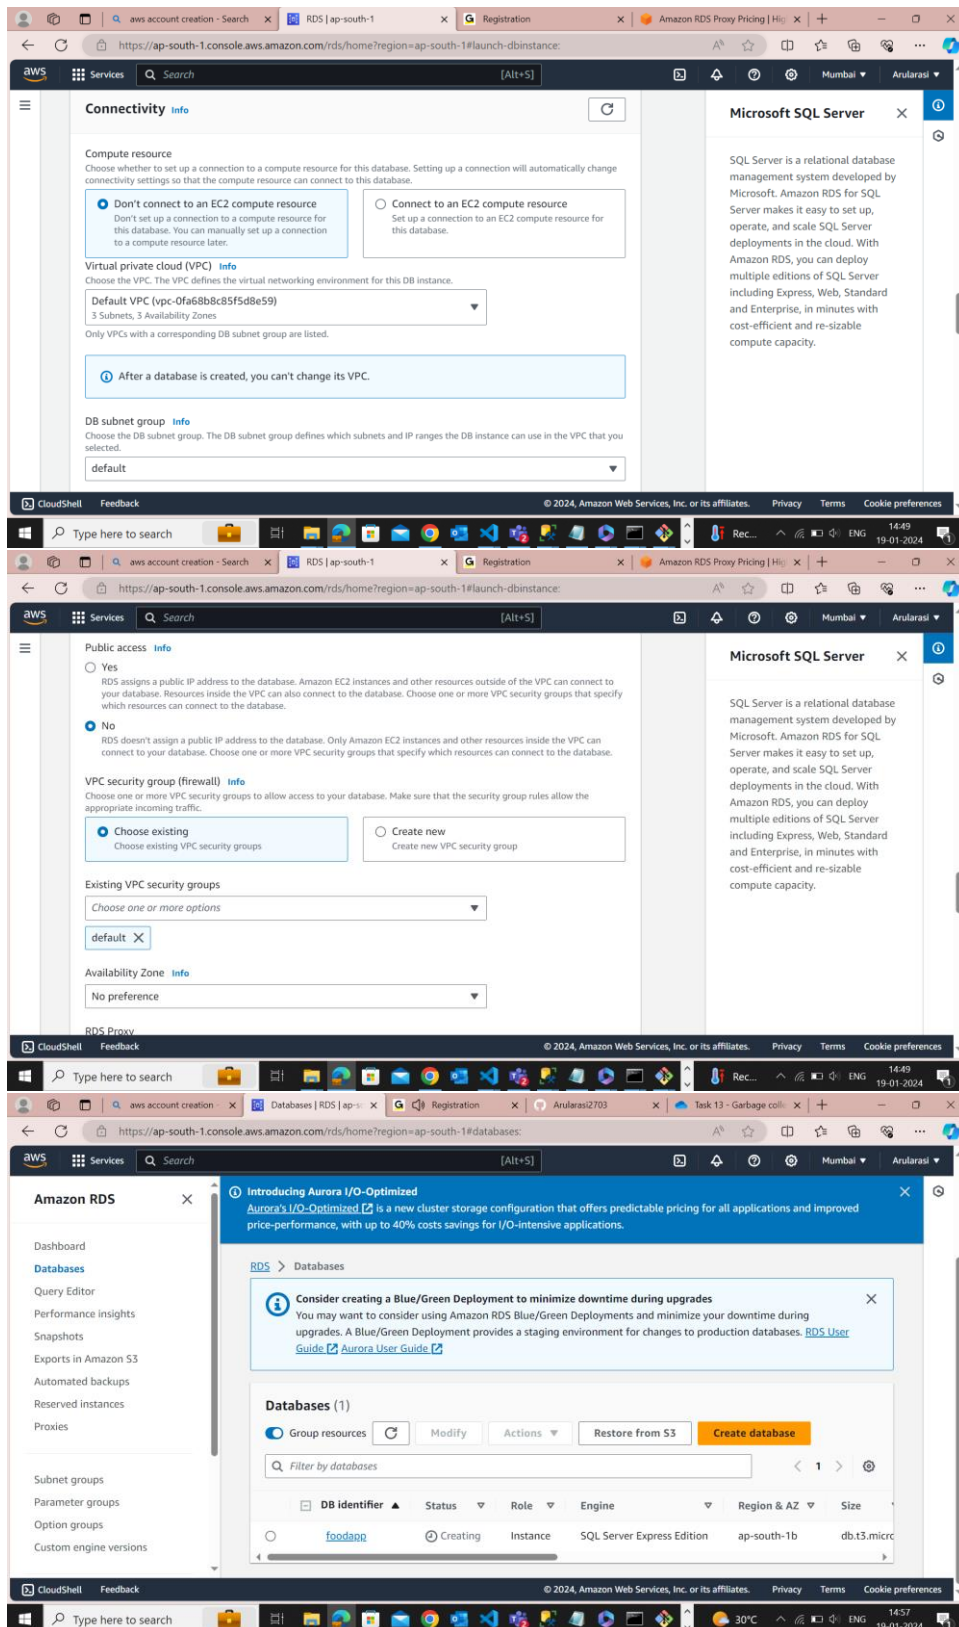

Name	Folder	Type
Screenshot (1).png	-	image/png

Bottom Screenshot: Create S3 Bucket
This screenshot shows the 'Create S3 bucket' page. The 'Bucket type' is set to 'General purpose'. The 'Bucket name' is 'appptask'. The 'Copy settings from existing bucket - optional' section is visible, and the 'Object Ownership' section is also shown.

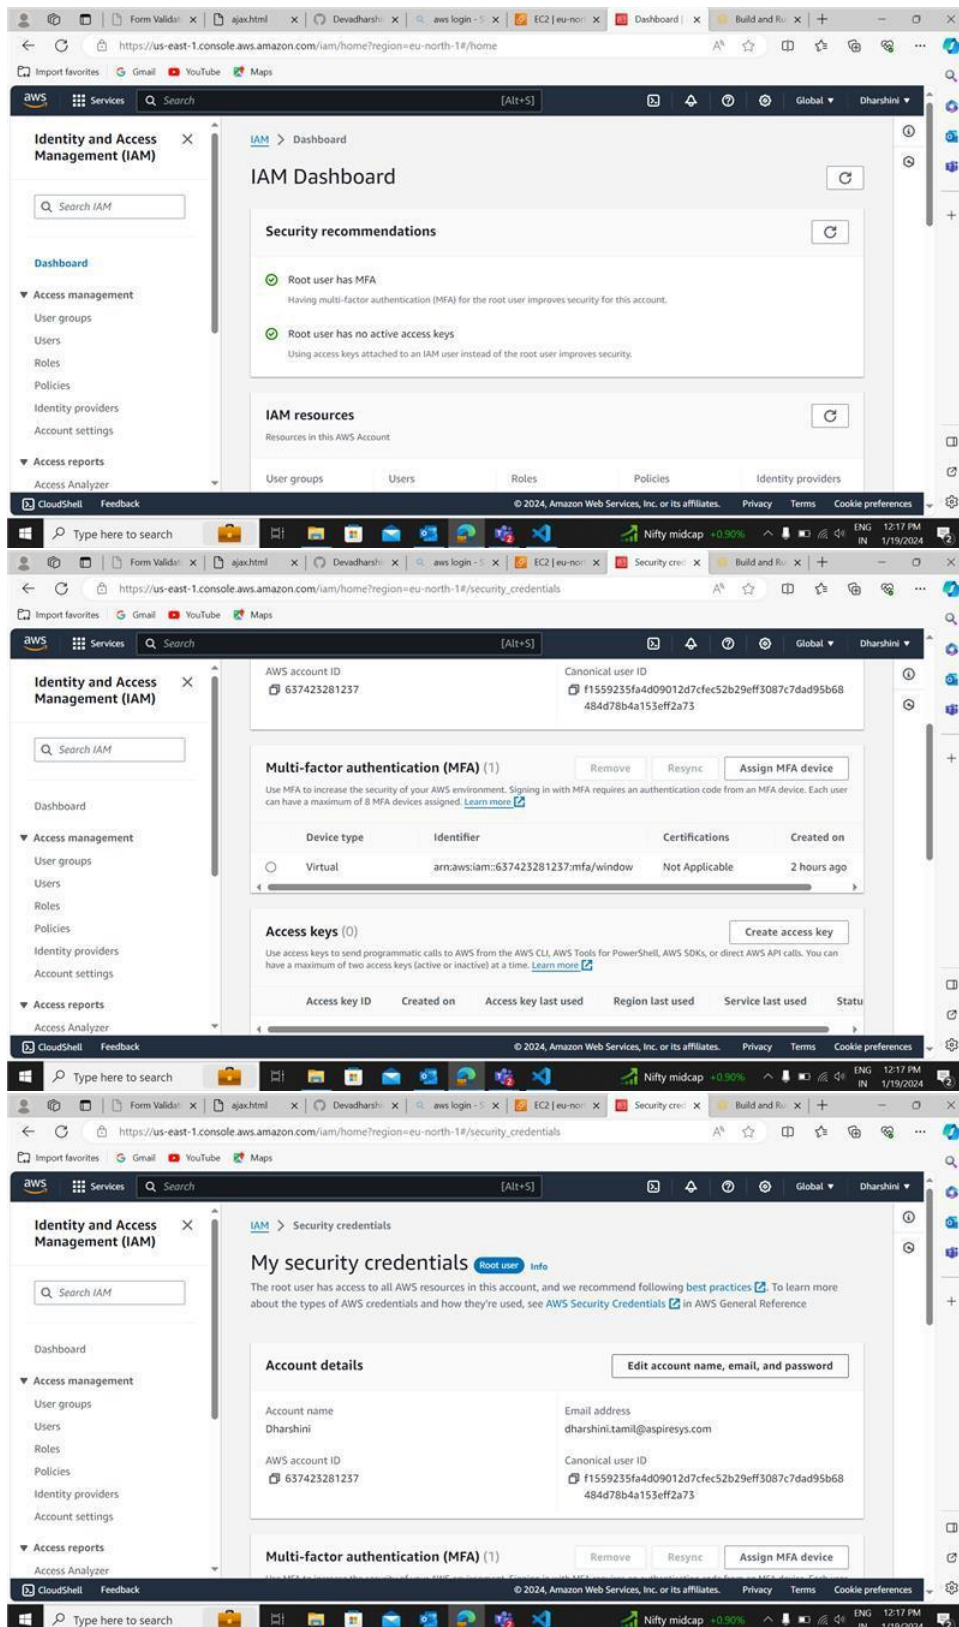

3. Relational Database Service (RDS):

4. Identity and Access Management (IAM):
